- ### 4.3 TaskListTool — ■■■■

— 100 —

- ## 4.4 TaskGetTool —

4.5 ■■■■ Prompt ■■■■

4.5.1 TaskCreateTool ■■■■

Prompt■■■■■■■■ LLM ■■■■■■:

■■■■■■■■■■

- ## 1. ■■■■When to Use This Tool■■■

- `taskStatus` — 3 `enum`
- `taskStatus` — `enum`
- Plan mode `enum`
- `taskStatus` todo list
- `taskStatus`
- `taskStatus` TaskCreate `enum`
- `taskStatus` in_progress
- `taskStatus`

2. `taskStatus` When NOT to Use `enum`

- `taskStatus` 1 `enum`
- `taskStatus`
- `taskStatus` 3 `enum`
- `taskStatus` / `enum`

3. `taskStatus`

- subject `enum`
- description `enum`
- activeForm `enum` spinner `enum`

4. `taskStatus`

- `taskStatus`
- `taskStatus` TaskUpdate `enum`
- `taskStatus` TaskList `enum`

5. `taskStatus` isAgentSwarmsEnabled() `enum`

- `taskStatus` "description `enum` agent `enum`"
- `taskStatus` "pending `enum` owner `enum` TaskUpdate `enum` owner `enum`"

4.5.2 TaskUpdateTool `enum`

`enum`: src/tools/TaskUpdateTool/prompt.ts

Description: Update a task in the task list

Prompt `enum`

1. `taskStatus`
2. `taskStatus` deleted `enum`
3. `taskStatus` status, subject, description, activeForm, owner, metadata, addBlocks, addBlockedBy
4. `taskStatus` pending → in_progress → completed `enum` deleted `enum`
5. `taskStatus` TaskGet `enum`
6. JSON `enum` 5 `enum` JSON `enum`

4.5.3 TaskGetTool `enum`

`enum`: src/tools/TaskGetTool/prompt.ts

Description: Get a task by ID from the task list

Prompt `enum`

- `taskStatus`
- `taskStatus` blocks/blockedBy `enum`
- `taskStatus`
- `taskStatus` subject, description, status, blocks, blockedBy

- `blockedBy`

4.5.4 TaskListTool

src/tools/TaskListTool/prompt.ts

Description: List all tasks in the task list

Prompt

- `status=pending`, `owner`,
-
-
- `ID`
- `id`, `subject`, `status`, `owner`, `blockedBy`

`isAgentSwarmsEnabled()`

1. `TaskList`

2. `status=pending`, `owner`, empty `blockedBy`

3. `ID`

4. `TaskUpdate` (`owner`)

5.
